

Blackberry 7520 Battery Replacement

Written By: Nathan

INTRODUCTION

For removing and replacing the Blackberry 7520 battery, follow this guide.

Step 1 — Battery

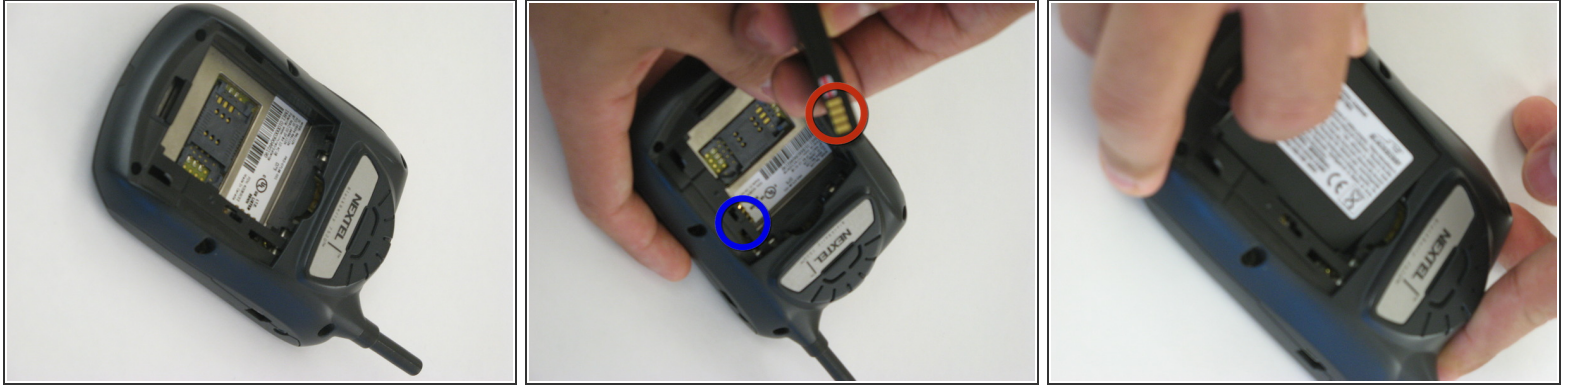

- Turn the phone upside down.
- Push down on the black button on the back of the phone to slide the rear panel off.
- The battery should be visible now.

Step 2

- Hold the BlackBerry in one hand face-up with the screen facing towards you.
- ⓘ **Gently** smack the phone against your hand to dislodge the battery.

Step 3 — Battery

- To install the battery turn the phone on its back.
- Line the battery in place where the gold connectors (red circle) line up with the gold pins (blue circle)
- Once the battery is lined up push the battery in and down until it is locked in.

Step 4

- Once the battery has been put back in, line the the black button (red circle) of the panel up with its socket (blue circle) in the BlackBerry phone.
- Push the panel inwards then down until it locks in.
- Once the panel is in you have successfully changed your battery!
